Key Projects

Side Projects

Prepo (AI exam prep), Mistri Dakun, Speed (AI site audit), UXAtom.com, AULA Studio

Websites

KubeDB, AppsCode, Stash

Product UIs

Cluster UI, KubeDB UI, Platform UI, Billing UI, Self-host UI

Private apps. Case studies: Kubernetes Consoles, KubeDB, UI Modernization, Design System, Product Sites, AppsCode Hub

Skills

DESIGN

- Product & UX Design
- Wireframing & Prototyping
- Design Systems & Tokens
- UX Research & Usability Testing
- Accessible UI (WCAG AA)

FRONT-END

- Vue 3, Nuxt, Pinia, TypeScript
- Tailwind CSS 4, SCSS
- Hugo, Web Performance & SEO

FULL-STACK & AI

- Firebase, D1, REST APIs
- Deploy: Cloudflare, Vercel
- AI features (Gemini, Groq)
- Claude Code, Cursor

Tools

Figma, Adobe Photoshop, VS Code, Git & GitHub

Languages

Bangla (native)
English (professional)

Education

BSc in Computer Science & Engineering

Southeast University, Dhaka

Diploma in Computer Technology (4y)

Cumilla Govt. Polytechnic Institute, Cumilla · 2018

Mohin Uddin

Product Designer for DevTools & Cloud-native SaaS

Dhaka, Bangladesh · Remote or on-site

Product designer with **9+ years** of UX and production UI, from Figma to Vue, for Kubernetes and database products. As the **only designer** at AppsCode Ltd., I turn complex, data-heavy infrastructure workflows into clear consoles engineers use daily, and built the design system behind 5 products. I also design, build and launch my own full-stack products, working AI-first.

Experience

AppsCode Ltd.

April 2019 — Present · 7+ years, promoted twice

Head of Design

January 2025 — Present

- Lead UX and front-end for the Kubernetes product suite as the only designer, from user flows and IA to production Vue UI.
- Redesigned KubeDB UI, the main product: one consistent page structure for **25+ database engines**, with guided forms for Day-2 operations (scaling, upgrades, backup, restore) instead of YAML and kubectl.
- Designed data-dense views for clusters, databases and billing: a fleet view across **8 cloud providers**, status-first tables, and one-click paths from a failing pod to its logs or shell, so engineers fix issues faster.
- Designed and shipped **5 platform consoles** in Vue/Nuxt (Cluster, KubeDB, Platform, Billing, Self-host) with single sign-in (case study).
- Migrated **7 repos** from Bulma to Tailwind CSS 4 in one month with no behaviour change; builds **up to 59% faster** (case study).
- Shape and prioritize the product roadmap directly with the CEO.

Senior UI/UX Engineer

January 2023 — December 2024

- Built the design system from scratch: **111 components**, one token file, theming and icons, used across 5 consoles (case study).
- Created one Hugo theme that runs **7 product websites** like KubeDB and Stash; every site scores **100 on Lighthouse SEO**.
- Guided a team of 5 front-end engineers on using and maintaining the design system, keeping UI and UX consistent across all products.

UI/UX Designer & Front-end Engineer

April 2019 — December 2022

- Redesigned the AppsCode website, product pages and brand, built in Hugo.

Front-end Developer – Cloud Software Solution

August 2018 — January 2019

- Built web pages and custom WordPress themes (HTML, CSS, JS).

Freelance UI Designer – Freelancer.com & Upwork

February 2017 — August 2018

- UI design and front-end for 10+ international client projects.

Side Projects

- **Prepo** – Exam-prep platform, built solo: user roles, real-time chat and AI answer checking (Nuxt, Firebase, Gemini).
- **Mistri Dakun** – Home-repair marketplace for Dhaka: booking, verified technicians, live map tracking and bKash payments.
- **Speed** – AI website audit tool for performance, SEO and UX.
- **UXAtom.com** – Brand identity and Vue/Nuxt website for a UI/UX design studio.
